

Environmental Policy

The Jean Cannon Group is committed to good environmental management and as such has its own environmental management system to assist us to run our business in a sustainable way

- We strive to continually improve our business operations and to reduce our environmental footprint and prevent pollution.
- When we change our operations, we assess the changes to prevent unforeseen environmental impacts of the changes.
- We regularly audit and review to monitor the effectiveness & suitability of the system.
- We identify our legal and other responsibilities so that we comply with or exceed these & where no appropriate regulations exist, we adopt appropriate standards.
- We include setting & reviewing environmental objectives & targets in our planning.
- We document and maintain procedures to communicate environmental matters and relevant information to all employees, customers & contractors and the public.
- We monitor our operations to check that we are behaving sustainably and that we efficiently use of natural resources and energy.
- We run our business so as to minimise & handle any incidents & emergencies should they occur.
